Groundwork for Industrial,  
Commercial & Private Clients

## Driveways

Have you thought about how much your property can be enhanced by a professionally installed driveway.

Our policy is to ensure that, whatever the chosen surface, your driveway is installed to last. From ground clearing to the finished surface all of the work is carried out by our direct employees who have many years of experience. We are flexible enough to make changes you may require as the work progresses.

There are various types and designs to choose from and we will be pleased to assist you in choosing the surface most suited to the terrain around your property.

Concrete block paving driveways can be designed to incorporate decorative patterns and edging. Planting areas and raised beds can also be included.

A resin bonded surface will look really professional and can be supplied in a variety of colours. This surface is non-permeable and has very little loose gravel. A resin bound surface has no loose gravel and is water permeable.

Tarmacadam or Bitmac surfaces can be relieved by incorporating white or coloured chippings.

If you prefer we can also install a loose gravel driveway with various sizes and grades of gravel.

Based near Aylesbury, our operational area includes Buckinghamshire, Hertfordshire, Bedfordshire, Berkshire and Oxfordshire, but if you have a driveway project in mind outside of this area please give us a call.
